

Gaza Fathya Akhdan

Fullstack Developer

Bekasi, Jawa Barat | +62 812-9810-4127 | gf.akhdan@gmail.com | linkedin.com/in/gfakhdan

SUMMARY

Vocational high school student and Full Stack Web Developer with experience in freelance projects and an ongoing internship developing an Employee Attendance and Payroll Management System. Proficient in JavaScript, Tailwind CSS, Bootstrap, PHP, and Laravel, with strong capabilities in building responsive interfaces and structured back-end systems to deliver practical and impactful web solutions.

SKILLS

Front-end Engineering

- **Styling & Framework:** Tailwind CSS, Bootstrap
- **Markup, Templating & Scripting:** HTML5, Blade, Livewire, JavaScript, React.js
- **UI/UX Tools:** Figma, Canva

Back-end Engineering

- **Language & Framework:** PHP, Laravel, Filament
- **Database:** MySQL, SQLite
- **API & Arsitektur:** REST API, MVC Architecture
- **Security & Auth:** Authentication (Session/Token), Laravel Sanctum, JWT, Middleware
- **Tools & Environment:** Git, GitHub, Composer, NPM, XAMPP, VS Code
- **Deployment:** Vercel

EXPERIENCE

UI/UX & FRONT-END DEVELOPER - TEH DEVELOPER (FREELANCE) Sep 2025 – Des 2025

- Designed and developed responsive user interfaces with HTML, CSS, and JavaScript for client projects.
- Created wireframes and prototypes to translate client needs into intuitive UI/UX solutions.
- Created social media content to promote Teh Developer's services.

BACKEND DEVELOPER INTERN - PT DIPURO BERKAH JAYA Mar 2026 – May 2026

- Developed and maintained back-end systems for an Employee Attendance and Payroll Management web application.
- Built and managed database architecture using MySQL to support efficient data processing and reporting.
- Implemented server-side logic using PHP and Laravel framework.

WEB DEVELOPMENT TRAINER - SMAN 44 JAKARTA Feb 2025

- Introduced high school students to JavaScript fundamentals including variables, functions, and DOM manipulation.
- Designed a beginner-friendly session bridging the gap between static HTML and interactive web experiences.

WEB DEVELOPMENT TRAINER - SMAN 17 BEKASI Feb 2026

- Introduced senior high school students to the fundamentals of HTML, covering document structure and semantic tags.
- Conducted hands-on practice sessions to help students build their first simple web pages from scratch.

UI/UX TRAINER - SMK 01 CIANJUR Aug 2025

- Taught foundational UI/UX principles including layout composition, color theory, and user-centered design thinking.
- Guided students in approaching design problems for both web and mobile applications with practical exercises using real design tools.

PARTICIPANT — GOOGLE DEVELOPER GROUP (GDG) DEVELOPER EVENT 2024 – 2026

- Attended 3 Google Developer Group (GDG) events, gaining exposure to the latest trends and technologies in web development, cloud computing, and software engineering.
-

ACHIEVEMENTS

1st Place — Website Development Competition, IDN Boarding School Internal School Competition · 2025

- Won first place by building a car rental management website featuring a complete booking system, vehicle listing, and admin dashboard.
- Demonstrated full-stack development skills from database design to a clean and functional user interface.

2nd Place — Website Development Competition, IDN Boarding School Internal School Competition · 2025

- Secured second place by designing and developing a mosque landing page highlighting programs, schedules, and community activities.
- Focused on clean visual layout with strong emphasis on accessibility and readability for all visitors.

3rd Place — UI/UX Design Competition, FUSE National Competition · Politeknik Manufaktur Bandung · 2026

- Achieved third place at a national-level UI/UX design competition competing against talented designers from across Indonesia.
 - Designed an E-Learning website with a focus on intuitive navigation and an engaging visual experience.
-

PROJECTS

E-Commerce Website · First Project · 2025 · Solo

- Developed a fully responsive e-commerce website featuring product listings, category navigation, and a clean shopping interface.
- Built using HTML and Tailwind CSS with a focus on modern UI and cross-device compatibility.

E-Library Website · Second Project · 2025 · Solo

- Built a digital library web application enabling users to browse and access reading materials online.
- Developed using HTML and Laravel with structured back-end logic and database management.

E-Gallery Website · Final Project · 2025 · Team

- Developed a Pinterest-inspired image gallery platform where users can upload, view, edit, and delete image content.
- Built using HTML, Tailwind CSS, Laravel, and MySQL with full CRUD functionality and a responsive interface.

Management PT DBJ Website · Ujikom & Internship · 2026 · Team

- Developed a comprehensive company management system featuring employee attendance (check-in & check-out), leave requests, payroll processing, and financial data analytics.
- Built financial reporting dashboards displaying income and expense graphs for real-time monitoring.

Lokal Mart Website · Techsoft Competition · 2026 · Team

- Developed a local marketplace platform showcasing Indonesian products with category filtering, product listings, and a clean e-commerce interface.
- Built using HTML and Tailwind CSS with a focus on accessibility and visual appeal.

UI/UX E-Learning Website · 3rd Place FUSE · 2026 · Team

- Designed a comprehensive E-Learning platform UI/UX covering course browsing, forum, leaderboard, and multi-category learning paths.
 - Created using Figma with a focus on intuitive navigation, engaging visual experience, and user-centered design principles.
-

EDUCATION

SMK IDN Boarding School (Islamic Development Network) Software Engineering (Rekayasa Perangkat Lunak)
Jun 2024 – Jul 2027 (Expected)
